Windows Iso File For Mac

For the last several years, you could use Disk Utility to mount the ISO image and then burn it to a disc.. Now click on File and then Open Disk Image The ISO image will show up in the left-hand side along with the list of hard drives, etc.

- 1. windows file explorer
- 2. windows file recovery
- 3. windows file system

Then just click the Burn button to start the burn process Another quick way to burn the ISO image file is to just right-click on the file and choose Burn Disk Image. Note: Before you do anything, back up your Mac This is always a good idea anytime you're modifying the partition table.
